Hello Andrew,

I was not able to get a hard quote for the structure needed for your project. However, based on recent pricing I got \$2,500 is a safe number to use for budgeting purposes. This included a 4' x 4' concrete structure with a 8" Fresno Valve slide gate and an 8" ADS corrugated pipe stubbed.

Let me know if you have any questions. I'll send you a firm quote when I hear back from my supplier.

Best Regards,

Greg Owens
